

## **Academic Advocate Materials Guidelines**

Please be advised that ISACA Academic Advocate content (“Material(s)”) is copyrighted and should be used in accordance with these guidelines and any instructions provided by the Academic Advocate Program.

### **Using the Materials**

Keep trademark and copyright information on any Materials used and provide appropriate attribution where portions of Materials are quoted/cited.

### *Reproducing Materials*

Academic Advocates, or those otherwise authorized to use the materials, may provide case studies to students by photocopying or by placing the case studies on a secure internal server that is accessible only to students. The answers/solutions (referred to as “Teaching Notes”) to the case studies may be shared only with other Academic Advocates and cannot under any circumstances be posted on an intranet or the internet, nor can the Teaching Notes be provided to students.

### *Prohibited Uses*

The answers/solutions (“Teaching Notes”) may not be reproduced or be provided to students or to other instructors. Should other instructors wish to use the materials, please have them contact the ISACA Academic Advocate Program at [teachingnotes@isaca.org](mailto:teachingnotes@isaca.org). Students are not permitted access to the Teaching Notes.

### **Using Other ISACA Publications**

Where ISACA publications (e.g., COBIT for Information Security, CISA Review Manuals) are to be disseminated in the classroom, please contact the ISACA Bookstore for an academic discount on your purchase of the publications, as opposed to reproducing the publications. Please bear in mind that placing ISACA publications on “Blackboard” or an intranet, requires ISACA’s permission and that the placement of ISACA publications on the Internet is prohibited.

### **Translations of Materials**

Because ISACA seeks to maintain consistent terminology and quality throughout all its Materials and publications, all translations must be approved and reviewed by ISACA prior to use. (See the separate Translation Agreement.) ISACA will retain ownership of such translations and will disseminate them to other Academic Advocates so that more students may benefit.

### **Use of ISACA Trademarks**

While ISACA asks that trademark (and copyright) information remain on the Materials provided, any other use of its trademarks must be reviewed for approval by ISACA prior to use.
